

Predictive Care for Modern EV Drivers

Designing a personalized platform that helps EV drivers monitor vehicle health and prevent unexpected failures

UX Case Study | Web Platform

Role: UI/UX Designer

Duration: 4 Weeks

Problem

As electric vehicles grow in popularity, many new EV adopters are interested in sustainable mobility but lack the experience to properly manage and maintain their vehicles. Users often feel uncertain about battery health, charging habits, and maintenance needs, which can lead to inefficient vehicle care and overlooked warning signs.

Goal

Design a personalized EV care platform that helps users easily understand vehicle health, monitor charging behavior, and receive clear guidance for maintaining their EV.

Solution

Develop EVCare, a platform that provides a vehicle health dashboard, battery and efficiency metrics, charging insights, predictive service alerts, weekly summaries, and personalized EV care recommendations to help users confidently manage their vehicles.

User Persona

KARTHIK

Accounts Executive

Age: 30 years

Education: B.E.ECE Engineering

Hometown: Chennai

Status: Living alone

Occupation: Working in a MNC

"I'm ready for the future of mobility, but I need clarity to drive it with confidence."

About

- Recently purchased his first electric vehicle
- Interested in sustainable mobility
- Needs simple explanations for EV data

Personality

- Practical and cautious
- Curious about new technology
- Prefers simple tools over complex systems

Goals

- Understand battery health clearly
- Develop better charging habits
- Maintain EV for long-term use

Frustrations

- EV dashboards show unfamiliar metrics
- Charging impact on battery is confusing
- Maintenance guidance is unclear

Needs

- Clear vehicle health dashboard
- Charging behavior insights
- Predictive maintenance alerts

Story Board

Curious About EV's

Initial Excitement

Facing Confusion

Finding EVCare Platform

Confident EV Owner

Design Insights

Simplify EV Health Data

Translate complex battery metrics and technical jargon into easy to understand visuals and indicators

Insights by Users

Users find battery data confusing and hard to interpret

Guide Charging Behaviour

Provide personalized insights and recommendations to help users adopt smarter charging habits

Insights by Users

Users are unsure about ideal charging practices and timings.

Enable Predictive Maintenance

Use data to predict potential issues and notify users before problems impact their vehicle

Insights by Users

Users want early affects and reminders for maintenance

Provide Personalized Insights

Deliver weekly summaries ,comparisons and actionable tips tailored to each user's driving pattern

Insights by Users

Users value personalized guidance relevant to their usage

Information Architecture

EVCare is structured around helping users understand their EV's health and take action with confidence.

User Flow

This flow illustrates how a new EV user can easily monitor their vehicle health and take action using EVCare.
