

PRIYADHARSHINI R

UI/UX Designer | Product Designer

Electronics & Communication Engineering foundation · AI-assisted design workflows

9500017718 | priyadharshinirajkumar87@gmail.com | [LinkedIn](#) | [GitHub](#)

UI/UX & Product Designer with an Electronics & Communication Engineering foundation, translating technical, data-heavy problems into simplified, user-centered products. Shipped two live end-to-end products — research through high-fidelity UI — across four design internships, working fluidly with AI-assisted tools to move fast from concept to interface.

SELECTED PROJECTS

EVCare — Predictive EV Health Monitoring Platform

Independent · Live

- EV owners face raw, fragmented diagnostic data that makes vehicle health hard to interpret at a glance.
- Conducted UX research end-to-end and restructured the information hierarchy around what a driver actually needs to decide, applying AI-assisted ideation to speed up prototyping in Figma.
- Independently designed and shipped a live dashboard that surfaces critical health signals first, reducing the cognitive load of reading technical vehicle data.

BloodBridge — Smart Blood Bank Prediction System

Team of 3 · Product/UI Lead · Live

- Emergency blood matching is slowed by fragmented, hard-to-search availability data across blood banks.
- Owned the product concept, frontend design, and UI within a 3-person team, structuring a real-time donor–recipient matching flow and using Google Stitch for AI-assisted prototyping.
- Designed search to prioritize blood group, location, and urgency together, built for fast decisions in time-sensitive situations.

EXPERIENCE

UI/UX Designer Intern — Spotnxt

Jul 2025 – Dec 2025

- Designed and iterated high-fidelity dashboard screens in Figma for an AI-powered Meta Ads optimization SaaS platform, translating complex advertising data into clear, actionable interfaces.

UI/UX Development Intern — Uniq Marketing

Jan 2026 – Mar 2026

- Researched competitors and business requirements to design a brand website end-to-end, translating findings into UI and communicating design rationale to marketing stakeholders.

Digital Communication & Web Design Intern — TECC, Chennai

Jun 2026 · 1 mo

- Supported digital communication and web-update materials for a diplomatic/educational event, coordinating content delivery across teams under tight deadlines.

Canva Template Designer Intern — Pacific Creation

Jan 2025 – Apr 2025

- Designed reusable templates for startups and small businesses using brand kits, balancing varied client requirements — several published and sold.

SKILLS

Design: UX Research, User-Centered Design, Wireframing, Prototyping, Interaction Design, Information Architecture, User Flows, Visual Design, Design Systems, Usability Testing

Tools: Figma, FigJam, Framer, Google Stitch, UX Pilot, Canva

AI-Assisted Design: Generative AI Workflows, Prompt Engineering, Rapid Prototyping, AI-Assisted Ideation

Technical: HTML, CSS, SQL, Frontend Implementation

EDUCATION & CERTIFICATIONS

B.E. Electronics & Communication Engineering — Meenakshi Sundararajan Engineering College, Chennai | CGPA 8.38 | Expected 2027

Fundamentals of UI/UX Design – Microsoft | Generative AI for UX Designers – Coursera | Usability Engineering – NPTEL, IIT Guwahati | UX Design Job Simulation – Lloyds Banking Group

Placement Coordinator (2025–Present) | Maintains an independent UX case-study portfolio
